# HOW LONG BEFORE YOU KNOW SOMETHING IS WRONG?

THE USER FRIENDLY STRATUS EMS CLOUD-BASED MONITORING SYSTEM PROVIDES  
 PEACE OF MIND KNOWING EVERYTHING IS OKAY WHILE YOU'RE AWAY.

## EXPANDABLE CLOUD-BASED MONITORING... CONVENIENT WEB-BASED MANAGEMENT

More than just temperature & humidity monitoring

### Popular Applications

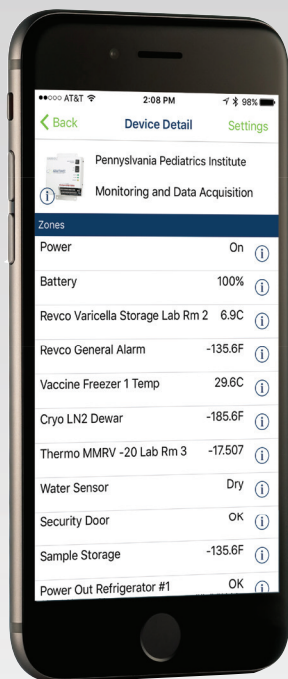

- Hospitals
- Clinics
- Pharmacies
- Blood Banks
- Universities
- Pharmaceutical Manufacturing
- Laboratories
- Pediatrics

### Environmental Conditions:

- Ambient and Ultra-Low Temperature
- Humidity Levels
- LN2 Cryogenic Freezers/ Dewar Levels
- Power Failure
- Alarm Outputs on refrigerators, freezers, etc.
- Water Detection
- Security
- Differential Pressures

The Stratus EMS works with other Sensaphone devices in verifying that everything is constantly stored at the correct temperature, that the power is on and much more. Demonstrate compliance with detailed data logs, reports, audit trails, graphs and min/max values. You get a cost-effective early warning system that can monitor up to 76 points and will send alarm messages to appropriate personnel via email, SMS, and/or voice phone call. All with the convenience of managing multiple devices from one login.

# ENVIRONMENTAL MONITORING FOR THE MOBILE AGE

- View your device's status in real time from a mobile app or any web browser
- Free unlimited e-mail and e-mail-to-text alerts. Add unlimited voice and text notifications with a low cost \$14.95/mo premium subscription.
- Connect up to 76 sensors to monitor temperature, humidity, water detection and more.
- Easily manage multiple devices from one account. Alerts can be set to notify specific personnel for each location.
- Internal battery backup will continue to run the system in the event of a power failure.

Mobile app available for Android and iPhone

## HOW IT WORKS

Select the sensors that meet your needs – from temperature, humidity, water detection, power failure and more. Simply connect the sensors to the Stratus EMS or compatible devices.

If using a compatible device such as the WEB600 or WSG30 they will need to be programmed then connected to the Stratus EMS. These devices provide an extra layer of redundancy by allowing additional notifications.

Create a free account on sensaphone.net, register your Stratus EMS, and begin programming. You can set limits on any connected devices or sensors and should they be exceeded, the Stratus EMS will call, text or e-mail any programmed users.

Remotely check on your applications using the app or login to your account to see real time status updates. No software is required, so installation, integration and management are easy.
